

The world's Most Powerful Waterfall

Murchinson Falls National Park in [Uganda](#) lie at the northern end of the Albertine Rift Valley, where the sweeping Bunyoro escarpment tumbles into vast, palm-dotted savannah.

First gazetted as a game reserve in 1926, it is **Uganda's largest and oldest conservation area**, hosting 76 species of mammals and 451 birds.

The park is bisected by the Victoria Nile, which plunges 45 meters over the remnant rift valley wall, creating the dramatic Murchinson Falls.

Centrepiece of the park and the final event in an 80 km stretch of rapids.

The mighty cascade drains the last of the river's energy, transmorming it into a broad, placid stream that flows quietly across the rift valley floor into Lake Albert.

At Marchinson Falls, the Nile squeezes through an 8 meters wide gorge and plunges with a thunderous roar into the Devil's Cauldron, creating a trademark rainbow.

This stretch of river provides one of Uganda's most remarkable wildlife spectacles.

Regular visitors to the riverbanks include elephants, giraffe and buffaloes; while hippos, Nile crocodiles and aquatic birds are permanent resident.
